Round

*Round Half Away from Zero*

**Description**

This is an ordinary rounding function, so called round half away from zero

**Usage**

```
Round(x, n = 0)

| x | numeric to be rounded     |
| n | indicating decimal digits |

**Details**

The function round in R base rounds to the even number, i.e. round(0.5) is 0 not 1. If you want rounding 0.5 be 1, you can use this Round function. This function is for the consistency with other software like MS-Excel, SAS.

**Value**

Round(x)
round(x) # compare with the above
```
